

ABSTRACT OF THE DISCLOSURE

Sub  
a1  
Operating mode indicator apparatus for a computer-pointing device may comprise a first illumination apparatus and a second illumination apparatus. The first illumination apparatus is operatively associated with the computer-pointing device and generates light when the computer-pointing device is in a first operating mode. The second illumination apparatus is operatively associated with the computer-pointing device and generates light when the computer-pointing device is in a second operating mode.
